Avalon GloboCare Announces Patent Issuance for Novel CAR-T and CAR-NK Cell Technology in Hong Kong

FREEHOLD, N.J., July 14, 2025 (GLOBE NEWSWIRE) – **Avalon GloboCare Corp. ("Avalon" or the "Company") (NASDAQ: ALBT)**, a developer of precision diagnostic consumer products, today announced the issuance of a new standard patent by the Hong Kong Intellectual Property Department (HKIPD) for its proprietary CAR-T and CAR-Natural Killer (NK) cell technology.

Granted based on a Chinese patent (ZL202080015205.0) and issued as Patent No. HK40074322, the Certificate of Invention represents a significant milestone in Avalon's global intellectual property strategy. The 20-year patent term, effective February 21, 2020, provides long-term protection for the Company's proprietary CAR-T and CAR-Natural Killer (NK) cell technology innovations in the Hong Kong Special Administrative Region.

Co-developed and co-owned with Avalon's strategic partner Arbele Limited, based in Hong Kong, this patent advances Avalon's positioning in chimeric antigen receptor (CAR)-based cell therapies. It complements the Company's existing patent protections in the United States and other jurisdictions under the Patent Cooperation Treaty (PCT).

The patented technology is designed to enhance the manufacturing, expansion, survival, and therapeutic efficacy of CAR-T and CAR-NK cells including:

- **Bispecific Anti-CD19xCD22 CAR Design:** Targets both CD19 and CD22 antigens expected to reduce the risk of tumor escape via antigen loss, a common challenge in hematologic malignancies.
- **Localized Cytokine Induction:** Intended to activate immune responses specifically at tumor sites, expected to improve CAR cell proliferation, cytotoxicity, and persistence while also attempting to stimulate the patient's own immune system.

"Securing this patent in Hong Kong marks an important expansion of our global intellectual property portfolio and reinforces our competitive positioning in the rapidly advancing field of cell-based immunotherapy," said David Jin, M.D., Ph.D., Avalon's CEO. "With 20 years of patent protection for our CAR-T and CAR-NK cell technology now secured in Hong Kong through 2040, this achievement represents a strategic step in strengthening our intellectual property portfolio."
